TANA[®]
WENZHOU TOPNOTCH MACHINE CO.,LTD.

Brief Introduction

Wenzhou Topnotch Machine Co.,Ltd., brand name TANA .established in the year 2003, located at China famous pump&valve TownOubei,Wenzhou. We'respecialized inproducing and marketing all kinds of industrial valves,pump & actuators. Our corporate Vision is to be a pipeline control specialist by supply products and help our valued customersolve their problems with excellent sales & after-sales service, and also reasonable price.

Over the years, we already have expanded our operations with team of well experienced design,manufacturing and marketing engineers. We have 100 -150 employees,around 50 sets advantaged producing equipments,which ensure our production ability. Our products have been widely application in the gas, oil, refining, chemical, marine, power generation and pipeline transmission industries. And 80% of products are supplied to SoutheastAsia, the Middle East, North America, Europe and Africa, more than 30 oversea countries / we have accumulated good reputation from our clients.

Quality is at the heart of everything we do, through product development to manufacturing, supply and sale. We make products strictly according to International standards & clients' requirements, and have established quality control system to ensure us offer the high quality products.

"Keep the promise and offer the top-class products &service" is our principle, we believe that we can establish and maintain long term win-win cooperation through our mutual effort by reasonable price, good quality product and best service.

Welcome to contact us, thank you!

目录 Contents

- 01-02 球阀的主要结构、功能和特点
Ball valve design feature
- 03 二片式锻钢球阀
2 Pcs forged steel ball valves
- 04-05 三片式锻钢球阀
3 Pcs forged steel ball valves
- 06 加长100mm接管三片式锻钢球阀
With 100mm pipe ends 3 pcs forged steel ball valves
- 07 三片式金属硬密封锻钢球阀
3 pcs metal to metal ball valves
- 08 三通L型锻钢球阀
3-way forged steel ball valves
- 09 对夹式锻钢球阀
Forged steel wafer type boll valve
- 10 二片式法兰连接浮动球阀
2 Pcs flange-floating ball valves
- 11 三片式法兰连接浮动球阀
3 Pcs flange-floating ball valves
- 12 德标法兰连接浮动球阀
Din flange-floating ball valves
- 13 双截止双排放针阀
Double-ended double-discharge valve
- 14 末端连接标准
Connection-end standards

球阀被广泛的应用在石油炼制、化工、造纸、制药、食品、水力、市政、钢铁等行业。其中抗硫系列球阀特别适用于含硫化氢介质、杂质多、腐蚀严重的天然气长输管线。

Ball valves are widely used in petroleum refining, chemical, paper making, pharmacy, food, water power, municipal, steel and other industries. Among them, sulfur-resistant series ball valves are particularly suitable for long-distance pipeline for transmission of high-corrosion natural gas with sulphureted hydrogen medium and many impurities.

球阀的全口径及缩径结构
FULL & REDUCE BORE

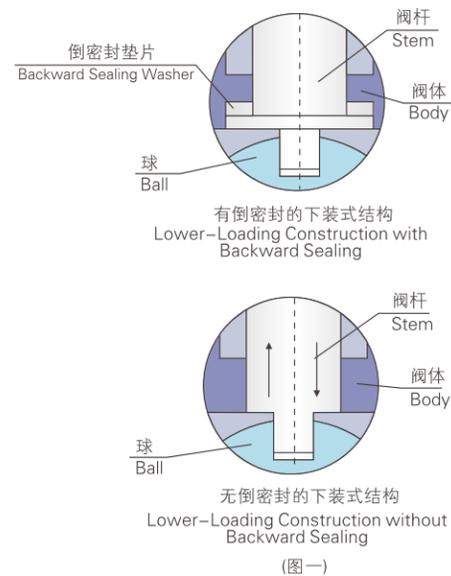

为满足客户的不同需求，球阀设有全通及缩径两大系列。全口径球阀的通道内径与管线内径一致，不但流体阻力最小，也便于管道清理。而缩径球阀的流体阻力比相同口径截止阀的流体阻力要低很多，重量比相同口径的球阀要轻30%左右，有效的降低了生产成本及价格，因而得到了较为广泛的使用。

In order to meet different needs of customers, we provide two series of ball valves, full bore and reduced bore ball valves. The channel inner diameter of full bore ball valves is consistent with the inner diameter of pipeline, which can not only minimize the fluid resistance but also facilitate pipeline cleaning. The fluid resistance of necked bore ball valves is much less than that of the globe valve with the same caliber while its weight is 30% lighter than ball valves with the same caliber. As a result, it can effectively reduce both the production cost and price, and is relatively widely used.

阀杆防冲出及有效密封结构
BLOW - OUT PROOF STEM

阀杆采用下装式、设置带有密封垫片的倒密封结构，倒密封的密封力随阀腔介质压力的增高而增大，从而确保阀杆的密封效果。当阀腔异常升压时，阀杆不会被冲出。填料采用设计合理的V型结构、能将阀腔内部的介质压力及外部压盖的锁紧力有效的转化成阀杆的密封力(如图一)。

The stem is downloading, with its inverted sealing structure with sealing gasket. The force of inverted sealing structure will increase while the medium pressure in the valve cavity increases, to ensure the sealing effect of the stem. In case of abnormal pressure increasing of the valve cavity, the stem won't be impacted out. The filler is designed with proper V-shaped structure, which can effectively convert the medium pressure inside the valve cavity and the locking force of outer gland into the sealing force of stem (Figure 1).

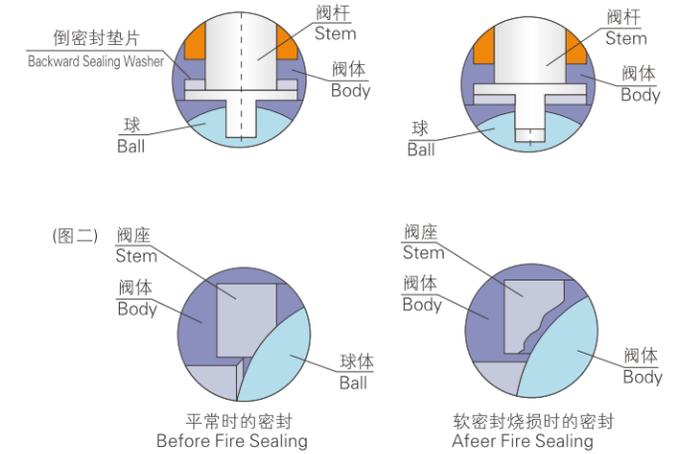

(图一)

耐火结构
FIRE SAFE SEAT SEALING

根据用户的需要，球阀可设计成耐火结构，当万一发生火灾而使密封圈烧损时，球阀的各个密封部位均能形成金属对金属的硬密封结构，有效阻止介质的扩散，防止火灾扩大(如图二)。

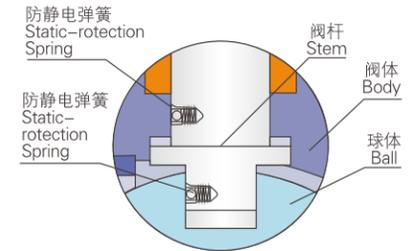

According to the user's requirement, the ball valve can be designed with fire-resistant structure. In case of a fire and the sealing ring is damaged, every sealing part of the ball valve can form the structure of metal-to-metal hard seal, which can prevent the spreading of both the media and fire (Figure 2).

防静电结构
STATIC-PROTECTING CONSTRUCTION

根据用户需要，球阀可设计防静电结构，即在球体与阀杆、阀杆与阀体之间设置导电弹簧，使阀门在开启过程中产生的静电能通过所设置的静电通道传入管路导入地下，达到清除静电的目的。避免静电打火点燃易燃介质，确保系统安全。(如图九)

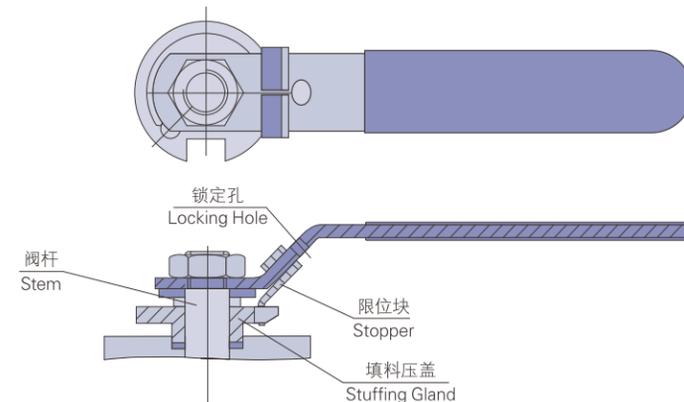

The ball valve could be designed as static-protecting construction as required, namely, mounting conductivespring between the globe body and stem, or between the stem and body. There after the static engendered during opening the valve could be conducted to pipelines then earth through the pre-set static passage to clear static away. The design works to prevent igniting combustible medium by static fire-striking for the system safety.(As shown in Figure 9)

带锁结构
INTERLOCKING DEVICE

对安装在野外的或防止非工作人员误操作的，以及在有些震动较大的场合手柄受到撞击易产生误操作的阀门，在阀门的全开或全关的位置设有锁定孔，需要时可加锁，起到安全保险作用(十二、十三)。

For valves installed outdoors,those preventing improper operation of non-workers and valves,of which collision of its stem in relatively violent vibration occasions easily causes improper operation, a locking bore can be set in the fully open position or fully closed position and a lock can be used if needed,for the purpose of security insurance (Figure 4).

对夹式锻钢球阀
FORGED STEEL WAFER TYPE BOLL VALVE

150LB-600LB

产品特点 / Features

对夹连接球阀具有结构紧凑、体积小、重量轻、密封性能好、启闭灵活、安装方便等特点。主要适用于石油、化工、冶金、制药、食品等各类系统中。

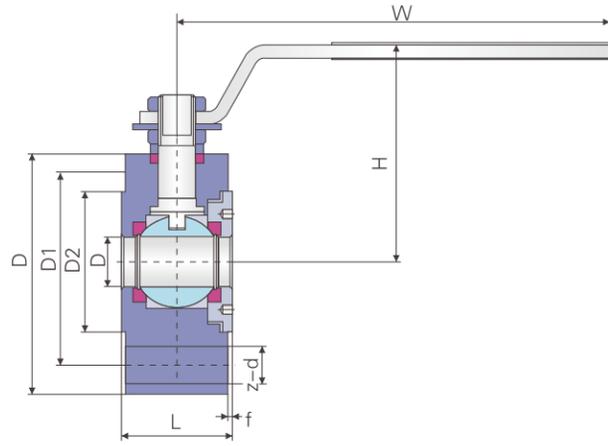

而保温对夹连接球阀良好的保温保冷特性既能有效防止管路中粘稠介质凝固，又能降低管路中介质热量的损失。

本系列对夹球阀可装上相应的电动及气动装置，以实现遥控或自动控制。

Wafer type Ball Valve possess such features as compact structure ,smaller volume ,lighter ponderance ,fine sealing performance ,flerible on-off, convenient installation couse, etc. It is mainly applied to transport the full-bodied mediums which solidify under normal temerature in such fields as perroleum industry,chemical industry, metallurgical industry,pharmaceutical industry,food Industry, etc.

insulation Wafer Type Ball Valve enjoys favorable heat/cold preservation performances which not only effectively prevent the slabby medium in the pipelines from solidifying but also reduce the heat loss of the medium in the pipeline.

Wafer Type Ball Valve series could also be applied with the mounted corresponding motor or air operated plant to implement remote control or automatic control.
