FITNESS FACILITY CLEANING SOLUTION

Gym Cleaning Pack for Fitness Centers, Training Areas & Pool Facilities

Designed for High-Traffic Fitness Facilities

A professional fitness facility needs more than regular floor cleaning.

Training areas, corridors, locker rooms, washrooms and pool areas all create different cleaning challenges — from black shoe marks and embedded dirt to edges, corners and hard-to-reach areas.

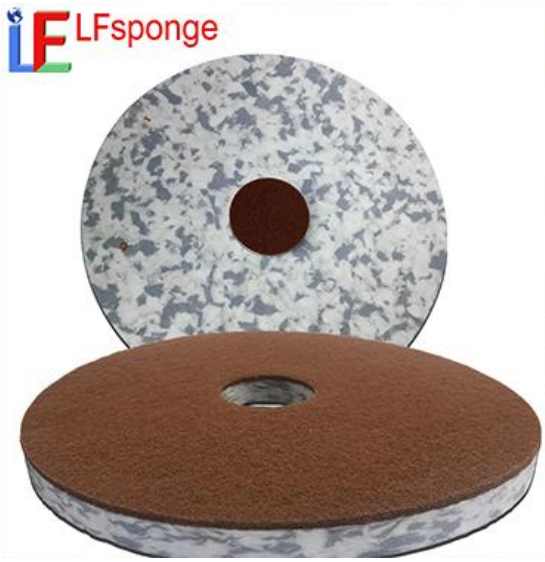

Our **Gym Cleaning Pack** combines three complementary melamine cleaning solutions to help fitness facilities maintain a cleaner appearance with less manual effort.

---

01. MAIN FLOOR CLEANING

17" Combo Melamine Floor Pad

For machine cleaning of larger floor areas

Life Nano Plastic Products (Zhangzhou) CO., LTD
Joy Lin Email: sales@lfsponge.com / manager@lifenano.com.cn

The 17" Combo Melamine Floor Pad is designed for use with suitable floor machines and is particularly useful for removing visible marks and stubborn surface contamination from hard floors.

Recommended Applications

- Ceramic tile
- Porcelain tile
- Suitable hard floors around rubber training areas
- Gym public areas
- Training areas
- Corridors and common areas
- Areas with visible shoe marks

Typical Cleaning Challenges

- Black shoe marks
- Foot traffic marks
- Embedded surface dirt
- General floor discoloration
- Stubborn marks that remain after conventional cleaning

Why Combo Melamine?

The melamine cleaning layer provides fine mechanical cleaning action, while the backing structure helps make the pad suitable for machine-based floor cleaning.

Recommended approach: use with water according to the floor and machine requirements, and always test on a small inconspicuous area first.

02. EDGES & CORNERS

Fleece Melamine Mop Pad

For edges, corners and areas difficult to reach with floor machines.

Large floor machines are efficient for open areas, but every fitness facility has areas that require manual cleaning.

Fleece Melamine Mop Pads can be used for:

- Wall edges
- Floor corners
- Around equipment
- Under or around gym machines
- Locker rooms
- Washrooms
- Poolside areas
- Narrow or difficult-to-access spaces

Key Advantage

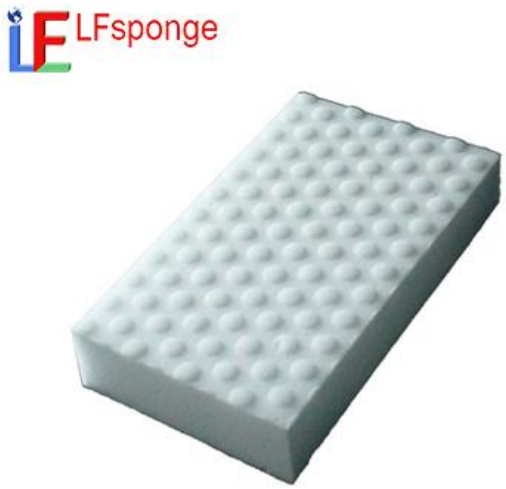

Instead of relying only on microfiber or conventional mop materials, the melamine cleaning surface provides additional mechanical cleaning action for stubborn marks and dirt.

03. SPOT CLEANING & POOL AREA CLEANING

Melamine Magic Sponge

For quick treatment of visible marks and localized stains.

Melamine Magic Sponge is ideal for small areas where a complete machine cleaning cycle is unnecessary.

Life Nano Plastic Products (Zhangzhou) CO., LTD
Joy Lin Email: sales@lfsponge.com / manager@lifenano.com.cn

Recommended Applications

- Poolside surfaces
- Washroom surfaces
- Locker rooms
- Wall marks
- Equipment surfaces
- Plastic surfaces
- Door and wall marks
- Localized shoe marks
- Small stubborn stains

Quick Spot-Cleaning Solution

For a gym cleaning team, a Magic Sponge can be kept as a convenient **ready-to-use spot-cleaning tool**.

When a visible mark appears, staff can deal with the problem immediately rather than waiting for the next full cleaning cycle.
